

**\*\*\* Note: Your file has *not* been replaced by this message. Your original file is still in the same location but now has a .ccsecure file extension appended to the file name.\*\*\***The file /All Files/BMI203/Github/HW2-BFS/data/citation\_network.adjlist > citation\_network.adjlist has content matching UCSF patient information. *All data with UCSF restricted information should be stored in a secure folder. Create a secure folder by adding Secure^ to the folder name (ex: "Secure^ Patient Data") then add files to the folder to have them encrypted.* The following actions have been taken:

- The file has been encrypted, and can only be opened using the CipherCloud agent.
- To download or verify that you have the CipherCloud agent installed, please visit <https://it.ucsf.edu/how-to/ciphercloud-agent>.
- If accessing from a mobile device, visit the Apple App Store or Google Play Store to download the CipherCloud mobile app.

**If you are a 3rd party (non-UCSF) collaborator to this folder, you will not be able to access this file.**For more information about how UCSF protects its restricted data see [CipherCloud](#) (MyAccess login required). Please contact the [UCSF IT Service Desk](#) at 415-514-4100 for assistance.
